

STATEMENT OF PURPOSE

RS23660C1

This legislation provides a framework for those naturopathic physicians who have graduated from an accredited Naturopathic Medical School and passed a national exam to become licensed. It establishes a board consisting of a medical doctor, a pharmacist, and naturopathic physicians. This will allow those naturopathic physicians to be able to practice to the scope of their training, while not infringing on others that are providing natural health care services.

FISCAL NOTE

There is no fiscal impact to the General Fund.
